- JavaScript
- C++ (Intermediate)
- Reactjs
- SQL, MySQL
- Machine Learning
- Web Development

LANGUAGES

- English (Fluent)
- Urdu (Native)
- German (Basic)

PROFILE

I'm an 18-year-old Computer Science student and passionate web developer specializing in building modern, high-performance websites using Next.js, Tailwind CSS, and MongoDB. I enjoy turning ideas into real products and solving problems through clean, scalable code. I'm continuously learning and always excited to take on new tech challenges.

EDUCATION

KIPS COLLEGE FPR LAHORE

2024 - 2026

CSS | PHYSICIS

Govt High School Gajjumatta Lahore

2022 - 2023

PROJECTS

Hafiz Quran Portfolio Website

17 JULY 2025

Developed a fully responsive and elegant personal website for a local Hafiz-e-Quran to professionally present his Quran teaching background, achievements, and availability for students. The site was designed with a clean Islamic theme, optimized for both desktop and mobile devices.

The website features structured sections such as an "About Me" area, detailed teaching experience, contact information with phone and email integration, and a downloadable CV. The UI is modern yet respectful to traditional aesthetics, using soft tones and calligraphy-inspired fonts to reflect the spiritual nature of the work.

Technologies Used:

- Next.js
- React,
- Tailwind CSS,
- TypeScript,
- React Icons,
- Responsive Design,
- Vercel
-
